

# BUTLER REGIONAL WWTP PROJECT UPDATE

## MESSAGE FROM THE MAYORS

February 2019

The Villages of Butler & Bellville will be providing this project update on a monthly basis as part of our effort to keep Village residents informed regarding the status of the new regional wastewater treatment plant. This update will be shared through the BAM newsletter and Facebook page for Village of Butler residents and the Village Website and Facebook page for Bellville Residents. If you have any questions, please send them to the respective Village and we will attempt to respond in a future monthly update.

*- Mayors Joe Stallard & Teri Breukus*

## WORK COMPLETED TO DATE

- Met with the Ohio EPA regarding the \$4 million dollar grant for the proposed treatment plant to discuss the project schedule.
- Received approval for the grant request in the amount of \$500,000 through the Ohio Public Works Commission.
- Met with the Ohio Development Services Agency to discuss grants through the Community Development Block Grant (CDBG) Program. The Village of Bellville is performing an income survey similar to what the Village of Butler already completed to be eligible for this grant option. ***If you are a Village of Bellville resident and are randomly selected to complete the survey, please complete it and send it back to the Village of Bellville offices as soon as possible, time is of the essence.***
- Once the grant package is finalized, the remaining funds necessary for the project will be through a 30-year 0% interest loan with the Ohio EPA.
- Completed the 60% design plans of the regional wastewater treatment plant, associated pump stations and sewers, and the removal of the existing Butler and Bellville treatment plants.

# BUTLER REGIONAL WWTP PROJECT UPDATE

## WORK TO BE COMPLETED

- Determination of the final funding package for the project.
- Finalize design of the new wastewater treatment plant, lift stations, collection system and the abandonment of the existing Bellville and Butler wastewater treatment plants.
- Submit plans to the Ohio EPA for Permit-To-Install Approval.
- Receive Ohio EPA NPDES Permit modification approval.
- Award the construction contract.
- Construction of the approved improvements.
- Operation of the new treatment plant and remove the existing non-compliant treatment plants from service.

*Future Wastewater Treatment Plant*
